SUMMARY

Highly motivated professional transitioning from Electrical Power Technology to Software Development. I am a highly adaptable and accountable developer who thrives in collaborative environments. Driven by a growth mindset, I am eager to continuously master new technologies and apply my logical foundation to build efficient, scalable solutions as a Fullstack Developer.

EDUCATION

CodeCamp Fullstack Developer #22 | January – May 2026

Group Project/ Activity Matching Platform (OnlyFriendssss)

- Implemented AI Face Verification (face-api.js), Real-time Chat (Socket.io), and Google Maps API.
- Secured sessions with Firebase Auth & JWT and built a responsive UI with Tailwind CSS.

Personal Project / Real-time NFC Running Tracker (Park Run Tracker)

- Developed a real-time lap tracking system utilizing NFC wristbands for runner authentication and checkpoints.
- Implemented Socket.io for instantaneous dashboard updates and used PostgreSQL with Prisma ORM for data logs.

Udon Thani Technical College | May 2017 – Oct 2019

High Vocational Certificate in Electrical Power Technology

SKILLS

- **Languages** : Javascript, Typescript, HTML, CSS
- **Frameworks & Library** : Node.js, Express.js, React.js, Next.js, Nest.js, Vue.js, TailwindCSS, SASS, Zustand, Socket.io, Fastify, JWT, Bcrypt, Figma, Git & GitHub, Postman, Axios, Swagger, RESTful API
- **Database** : MySQL, Prisma, Firebase, PostgreSQL, MongoDB
- **DevOps / Deployment** : Docker, Vercel, Render

WORK EXPERIENCE

Family Business (Textile) | Oct 2022 – Nov 2025

- **Inventory Management**: Managed and tracked stock levels systematically to ensure seamless daily operations and prevent supply shortages.
- **Financial Calculation**: Responsible for calculating product pricing and service costs, ensuring accuracy in billing and financial records.

Udon Air Ban | June 2019 - May 2020

Air Conditioning Technician (Full-time & Intern)

- Promoted from Intern to Full-time after 3 months for outstanding technical performance.
- Applied systematic troubleshooting and logical thinking to repair complex systems.
